NUSUM TRIVENI

Student|Aspiring-Developer

Profile

As a CSE student, I'm driven by innovation and precision. With a passion for coding and a flair for problem-solving, I'm dedicated to mastering the latest technologies. I thrive on collaboration and aim to leave a lasting impact through my creative solutions.

Experience

Robotic Process Automation Club

Technical core member

2023
-
present

- Led initiatives in the RPA Club, organizing workshops and competitions to explore RPA's potential in streamlining business processes.
- Developed technical and leadership skills, driving collaboration and innovation while deepening understanding of automation principles within the technology community.

Projects

Online Job Portal [Python Full Stack Web Development]

- Developing an online job portal using Django, Python, and Bootstrap, implementing features such as search and application submission while leveraging Django's MVC and Bootstrap for responsive design.
- Proficient in backend development, frontend design, and database management, ensuring efficient data handling within a tech-driven environment.

My Portfolio [HTML, CSS]

- Designed and implemented a dynamic portfolio website using HTML and CSS, showcasing projects and skills while ensuring seamless user experience and visual appeal.

The Bibliophile [JAVA]

- Developed the Bibliophile Project using Java GUI, incorporating intuitive interfaces for seamless book collection management.
- Leveraged Java's object-oriented programming principles for efficient data handling and inventory management within the application.

Certifications

NPTEL Certifications

- Elite certificate - Programming in Java
- Elite + Silver - Problem solving through C
